Kapa Code of Ethics Champions undergoing training on ethics management, case investigation and reporting - 2014

CODE OF ETHICS FOR BUSINESS IN KENYA

Kapa Oil Refineries Ltd signed up to support and implement the Code of Ethics for Business in Kenya in March, 2012.

The Code of Ethics is an initiative of the business community through Kenya Association of Manufacturers to promote and enhance ethics and business conduct in Kenya. The code is based on the ten principles of the UN Global Compact as captured in the four thematic areas of Human Rights, Labour Standards, Environment and Anti-corruption. The Company has established policies on these areas and not only implement them but also expects business partners to adhere to them and does not replace, but complements, the Company's Code of Ethics.

The Code states:

"We, the Business Community, recognise that ethical business brings about good business. We are committed to play a proactive role in building a globally competitive and prosperous nation, with a high quality of life, as envisioned in Vision 2030. As good corporate citizens, we commit to treating our stakeholders with respect, to run our businesses with responsibility, to act in compliance with applicable laws, and to be actively involved in corruption prevention. Our commitment to these ethical standards determines our interaction with our stakeholders (that is, our organisations; our shareholders and investors; users of our products and services; our suppliers, contractors and agents; our society; and our state and government) and the environment". As a company, we aspire to live up to the code and adhere to its requirements, basing our company policies on the code and dedicating resources towards achieving aspirations of the code. We shall strive to ensure that our operations serve to strengthen this code.

As a socially responsible and ethical organization, Kapa commits to:

- Treating our stakeholders with respect,
- Run our business responsibly with accountability, integrity, honesty and transparency,
- Act in compliance with applicable laws, and
- Be actively involved in the prevention of corruption.

It is our intention, as an organization, to live up to the spirit of the Code of Ethics for business in Kenya and conduct our business in an environment that is ethically sound.

ABOUT KAPA OIL REFINERIES LTD

HISTORY OF KAPA

The name 'Kapa' is an acronym derived from the title 'Karania Packers' which was established in the late 1960's as a salt packaging and baking powder manufacturing company.

Karania Packers grew steadily and within a short time, ventured into producing cooking fats and edible oils. As a result, it now became known as Kapa Oil Refineries Ltd. While treading in new territories, Kapa showed its commitment to innovation by being the first manufacturing company to introduce packing of cooking fats in reusable plastic containers; a norm that all cooking fat manufacturers now follow.

As the industry quickly expanded, Kapa steadily acquired more market share. In succession to the cooking fat and edible oils, Kapa started manufacturing a premium detergent powder: 'Toss', that took the detergent powder market by storm. Toss has been and still is the market leader in the detergent powder category.

With continual research and development, Kapa saw prospective opportunities in the FMCG industry and proceeded to manufacture different varieties of laundry bar soaps followed by margarine, glycerine and luxury bath soaps.

In 2003, Kapa cemented its commitment to quality by being certified the prestigious ISO 9001:2000 award for its 'Quality Management Systems' in the manufacture of cooking fats, edible oils, margarine, baking powder, laundry soaps and glycerine.

Kapa is proud to be the first company in the manufacturing sector to be HACCP UK certified for its edible oil processes. Kapa takes pride in manufacturing qualitative and affordable end products for its customers. Due to this factor, Kapa has always and keeps enjoying unmatched brand loyalty from satisfied customers.

Kapa's products are now trusted household names, not only in Kenya, but throughout East, Central, West and Southern Africa, as we export our diverse range of products to over 18 African countries serving the COMESA and SADC markets.

Being a consumer health driven company, Kapa believes in the manufacture of safe and healthy edible products. Unlike other cooking fats, oils and margarines in the market, Kapa products are NON-HYDROGENATED. Hydrogenation is a harmful process which alters the composition of raw materials to resemble those of plastic with the addition of trans-fatty acids as a by-product of this process. All our cooking fats and cooking oils are free of hydrogenation thus making them heart-friendly, cholesterol free and beneficial to the health and well-being of all our consumers.

ABOUT KAPA OIL REFINERIES LTD

Rina V egetable O il i s p rocessed in an ex tremely modern and technologically advanced refining plant.

- This d ouble r efined p ure v egetable p alm o il i s n on-sticky, w ith a l ow te ndency to s moke a nd h as a n extended life.
- This makes it extremely economical as it can be used over and over again.
- Ideal for both shallow and deep frying, Rina Vegetable Oil gives your food a superior taste.
- Derived from palm oil which is rich in Vitamin A, Rina Vegetable Oi l is benefi cial t o the he alth con scious consumer.
- Use Rina Vegetable Oil to fry crispy golden bhajias and crisps.

For more details on product code and sizes, refer to the last pages.

EDIBLE OIL

Captain Cook Corn Oil is a 100% pure corn oil and is manufactured using the most modern refining processes and technologies available.

- It's cholesterol free, making it heart friendly.
- Captain Cook is fully winterised and thus does not solidify in cold weather. The oil is also de-waxed to avoid becoming cloudy in appearance.
- Rich in Vitamins A, D and E, it is ideal for your family's health.
- A multipurpose clear cooking oil, it can be used for shallow frying and deep frying.
- Use Captain Cook as an oil base for salad dressings, mayonnaise and sauces.

For more details on product code and sizes, refer to the last pages.

EDIBLE OIL

Made from sunflower seeds, Rinsun Sunflower Oil has the nutrients Omega 3 & 6, vitamins and proteins that help to strengthen your body's immune system. Optimal balance of fats allow for excellent functionality and stability in cooking and frying. It's also consistent with current dietary fat recommendations that advise us to increase poly and mono-unsaturated fats while keeping saturated and trans-fats low. Rinsun Sunflower Oil is high in poly and mono-saturated fats, is naturally trans-fat free, making it a healthy choice over all other oils.

- Rinsun is appealing to customers because it is a clear oil and provides a clean, light taste that allows the flavours of foods to shine through.
- Manufactured and processed using ultra-modern refining technology, Rinsun is the ideal choice for the health conscious consumer.
- Fully winterised and de-waxed, it is cholesterol free and has mono-unsaturated fats which are heart friendly.
- Use Rinsun for your daily sautéing and salad dressings.

For more details on product code and sizes, refer to the last pages.

Olivia®
EXTRA VIRGIN OLIVE OIL

In the South of Spain lies the fertile land of Andalucía; the land blessed by nature and the crisp Mediterranean climate; the land that bears some of the finest olives in the world; the land that gives birth to Olivia.

- **Nothing but Olives**
  These harvested fine olives are mechanically cold pressed, to extract the rich golden olive oil. Needless to say, no solvents are added during processing and the product is free of any oils derived from the milling leftovers (like olive seeds or pomace). This is what gives Olivia its unique flavour and full-bodied taste, making it ideal for salad dressings, marinades and sautéing.
- **Elixir of Life**
  Research shows that Extra Virgin Olive Oil contains mono-unsaturated fatty acids, Vitamin E and powerful antioxidants that help decrease the overall risk of coronary artery disease. It is easily absorbed by the body and is known to slow down the ageing process. Little wonder, it is titled the healthiest cooking oil available on the shelf.

  Olivia Extra Virgin Olive Oil is approved by the International Olive Oil Council (IOOC), the Worldwide Governing Body for the Olive Oil Industry.
